- [Foundations of Cybersecurity](#)

EDUCATION

BACHELOR OF TECHNOLOGY
ST.JOSEPH'S INSTITUTE OF
TECHNOLOGY

2022 - 2026 (Currently Enrolled)

EXPERIENCE

SUMMER INTERN - VALEO PVT. LTD.
INFORMATION SECURITY
JUNE - AUGUST 2024

DESCRIPTION:

- Worked with the SOC team at Valeo, a R&D-focused company, managing real-time threat detection and response.
- Gained hands-on experience in securing IT infrastructure and implementing advanced cybersecurity measures in a dynamic environment.

FULL STACK DEVELOPER INTERN - ADRIG AI
TECHNOLOGIES
DECEMBER 2024 - PRESENT

DESCRIPTION:

Contributed to developing scalable web solutions as part of an innovative AI-focused start-up. Collaborated on designing and deploying cutting-edge applications tailored to client needs, leveraging modern technologies for efficient and seamless user experiences.

Key Projects:

- Internal Management System for Southern Railways of India:
 - Developed and optimized a secure and efficient system to streamline internal operations and enhance management workflows.
- Web Application for Deployed Chatbots:
 - Made a web application that enables clients to integrate fully trained chatbots into their websites as React code snippets. This dynamic solution supports deployment based on client-provided website links or descriptive documents.

ACHIEVEMENTS

SMART INDIA HACKATHON 2024 FINALIST

A platform designed to empower students to enhance their entrepreneurship skills. Developed a web application using Next.js, featuring a robust backend with Google Sign-In, tracking and analytics, and media upload capabilities.
